Project Name:	<Weather Wear >
Team:	<Bad Ideas>
Project Description:	<A benefit statement that describes the project concisely.>
	For <Users>
	who <do not know have the time to wear clothes or buy them according to the weather>
	the <Weather Wear Application>
	is a <Weather-Based Clothing Recommendation System
	that it suggests clothing options based on current weather forecasts using advanced machine learning.
	unlike <other weather applications or clothing accessories>
	our application <helps users pick the best outfits for their travel plans, activities, or packed schedules. Considering the weather, it makes getting dressed easier whether you're on the go or planning a trip.>
Benefit Outcomes:	- Saves time and allows users on better planning. - Users need not be worried about them being overdressed or underdressed. - This makes them prepared for the unpredictable weather. - Makes the selection of clothes seamless
